United States Air Force
Whiteman Air Force Base

Restoration Advisory Board Community Interest Assessment

The United States Air Force has been conducting environmental restoration investigations and cleanup/monitoring activities on Environmental Restoration Program (ERP) sites at Whiteman Air Force Base (WAFB) since the 1980s.

Over the course of these activities, WAFB has afforded the opportunity for interested stakeholders in the community to review progress, participate in a dialogue with, and provide comments and advice to WAFB's decision makers concerning ERP matters. The forum for this exchange of information has been through the Restoration Advisory Board (RAB) process.

In accordance with the Department of Defense and Air Force policy, when restoration activities occur at installations and there is no active RAB, installations are required to assess community interest at least every 24 months and document the results and decision in a Memorandum for Record signed by the installation commander.

WAFB encourages the general public to review up-to-date information regarding ERP activities on WAFB at Information Repositories we maintain at the Trails Regional Library Knob Noster Branch at 202 N Adams Ave in Knob Noster, MO or at the WAFB library on base. The content in both of these repositories is identical.

This notice invites interested parties in the community to assist in the process of evaluating if there is sufficient interest to re-establish a formal RAB for ERP activities at WAFB.

Local community members can express their interest in participating a Restoration Advisory Board by completing the questionnaire at <https://www.surveymonkey.com/r/S5M537Z>, no later than 31 March 2023.

Comments may be provided to the following by 30 April 2023:

Mr. Paul E. Takacs
Environmental Restoration Program Manager
AFCEC/CZOM
709 Ward Drive – Suite 290
